Project Title

Quiz App – An interactive and responsive quiz application that presents multiple-choice questions related to web development and provides instant feedback and score calculation.

Objective

The objective of this project is to build a mini-interactive JavaScript application using DOM manipulation. The application tests users' knowledge of web development concepts and demonstrates dynamic content rendering, event handling, and score tracking.

Description

The Quiz App is a browser-based application developed using HTML, CSS, and JavaScript. It displays multiple-choice questions one at a time, checks the selected answer instantly, highlights correct and incorrect responses, and shows the final score at the end. The application also includes a Start Quiz button, question counter, and Restart Quiz functionality.

Features

- Start Quiz button to begin the quiz
- 5 multiple-choice web development questions
- Question number indicator (e.g., 1/5)
- Instant answer validation
- Correct answer highlighting
- Score calculation
- Final score display
- Restart Quiz functionality
- Fully responsive design
- Attractive gradient background
- Footer with developer credit

Technologies Used

- HTML5
- CSS3
- JavaScript (DOM Manipulation)

Project Structure

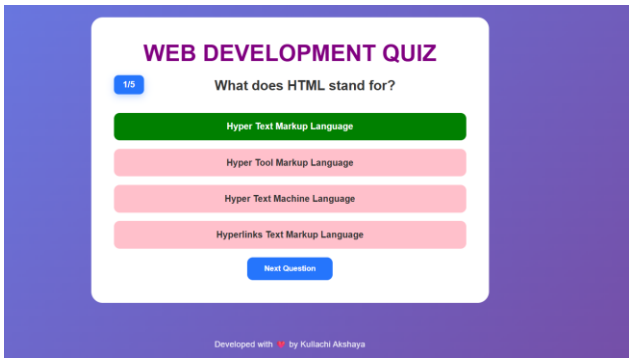
```
quiz-app/
│── index.html
│── style.css
│── script.js
│── README.md
```

SCREENSHOTS

1. Home Screen with Start Quiz Button

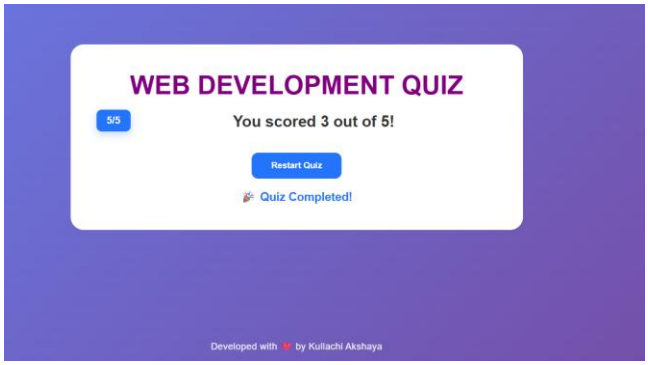
2. Question Display with Options

3. Correct Answer Highlight

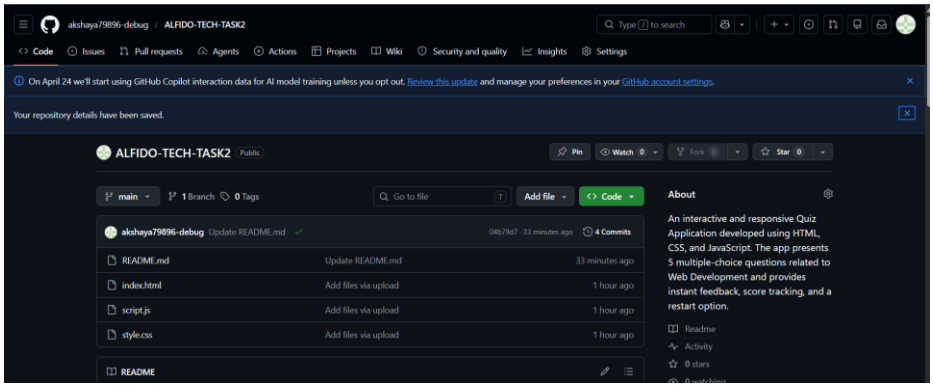


4. Wrong Answer Highlight

5. Final Score Screen



6. GitHub Repository



Code Snippets

- **HTML Snippet**

```
<div class="quiz-container">
    <h1>WEB DEVELOPMENT QUIZ</h1>
    <button id="start-btn">Start Quiz</button>
    <div id="question-number" class="hidden"></div>
    <h2 id="question" class="hidden"></h2>
    <div id="answer-buttons"></div>
    <button id="next-btn">NEXT QUESTION</button>
    <div id="result" class="hidden"></div>
</div>
```

- **CSS Snippet**

```
body {
    min-height: 100vh;
    display: flex;
    justify-content: center;
    align-items: center;
    background: linear-gradient(135deg, #667eea,
#764ba2);
}
```

- **JavaScript Snippet**

```
function startQuiz() {
    currentQuestionIndex = 0;
    score = 0;
    showQuestion();
}
```

Commands Used

- git init
- git add .
- git commit -m "Added Quiz App Project"
- git branch -M main
- git remote add origin https://github.com/akshaya79896-debug/ALFIDO-TECH-TASK2.git
- git push -u origin main

GitHub Repository Link

https://github.com/akshaya79896-debug/ALFIDO-TECH-TASK2

Live Hosted Website Link

https://akshaya79896-debug.github.io/ALFIDO-TECH-TASK2/

Deployment Process

1. Created a GitHub repository named ALFID0-TECH-TASK2.
2. Uploaded all project files.
3. Opened Repository Settings.
4. Navigated to Pages.
5. Selected **Deploy from a branch**.
6. Chose the main branch and /root.
7. Saved the settings.
8. GitHub generated the live website link.

Testing

The application was tested for:

- Start Quiz button functionality
- Question rendering
- Answer selection and validation
- Score calculation
- Restart Quiz button
- Responsive design on desktop and mobile devices
- GitHub Pages deployment

Learning Outcomes

Through this project, I learned:

- DOM Manipulation in JavaScript
- Event Handling
- Dynamic Button Creation
- Conditional Logic
- Score Tracking
- Responsive UI Design
- Git and GitHub Deployment
- GitHub Pages Hosting

Conclusion

The Quiz App was successfully developed and deployed as an interactive JavaScript project. It demonstrates practical use of DOM manipulation, event handling, and responsive design principles. This project enhanced my understanding of frontend development and strengthened my JavaScript skills.

Declaration

I hereby declare that this project, **Task 2 – Quiz App**, was designed, developed, tested, and deployed by me as part of my Frontend Developer Internship at Alfido Tech. The work presented in this documentation is original and completed using HTML5, CSS3, and JavaScript.
